

Female Reproductive System

Today you are going to research the female reproductive system. Answer all of the following statements or questions in order.

- Title your project **FEMALE REPRODUCTIVE SYSTEM** and type your names below it.
- Detailed picture of the female reproductive system **AND** a picture of an egg cell surrounded by sperm cells.
- A detailed description of the function of each part. Describe each section in the order it appears below.

Female System

Ovaries

Fallopian Tubes

Uterus

Cervix

Vagina

- Describe the oocyte in the system. Be sure to include approximate size, chromosome number and why the egg cell is so much bigger than the sperm cell.
- Describe the stages that occur in the ovary each menstrual cycle.
- Where is the egg fertilized, how long is it viable and how long will it spend in the fallopian tube?
- Some women may have unprotected sex and the next day fear they may be pregnant and opt to take something called the “**DAY AFTER PILL**” Briefly explain how this works.
